

Reliability that keeps **energy** **moving**

Complete O&M solutions for transmission lines with safety, efficiency,
and operational excellence.

CORPORATE PRESENTATION 2026

WHO WE ARE

History, evolution, and commitment to Brazil's energy

Founded on March 20, 2009, located in Comodoro – Mato Grosso, NEIVA SERVIÇOS has established itself as a strategic benchmark in the national electricity sector.

Aligned with market trends and through solid partnerships with major brands, we act as a provider of customized solutions and integral projects in O&M services for Power Transmission Lines.

Our work ranges from continuous services to complex one-off interventions, always focused on safety, quality, and operational efficiency.

Operational Highlights:

Specialized multidisciplinary teams

Own fleet of vehicles and equipment

Nationwide reach across several states

17+

YEARS OF EXPERIENCE

OUR SERVICES

Complete and integrated solutions for the transmission sector

Maintenance and Commissioning

Inspections, tests, and normalizations on Transmission Lines to ensure operability.

Vegetation Suppression

Clearing of the right-of-way and tower areas to prevent interference with the grid.

Access Road Opening

Restoration and construction of safe paths for access to the structures.

Tower Retensioning

Adjustment and maintenance of guy wires to ensure the structural stability of the towers.

PRAD Execution and Maintenance

Degraded Area Recovery Plans focused on environmental compliance.

Live-Line Services

Maintenance with the grid energized and specialized training for electricians.

Measurements and Counterpoise

Installation of counterpoise cables and precise measurement of electrical resistivity.

Own fleet and equipment

Own vehicles, machinery, and equipment, ensuring agility, operational availability, and greater control in service execution

Field Operations

Photographic record for each service performed

Neiva's photographic records are produced with georeferencing to compose the technical documentation of our clients' projects. For institutional disclosure, the images follow strict confidentiality and information security protocols.

COMMISSIONING

ANTI-PERCHING SYSTEM INSTALLATION (LIVE LINE)

EMERGENCY RESPONSE

RIGHT-OF-WAY CLEARING

RESISTIVITY MEASUREMENT

PRAD

SECTIONING & GROUNDING

OUR MISSION

**To perform services with
excellence to exceed our
clients' expectations.**

OUR VISION

**To be the benchmark in O&M for
Power Transmission Lines, with
credibility, effectiveness,
commitment, safety, and quality.**

OUR VALUES

The fundamental principles that guide our work

ETHICS

We act with integrity, transparency, and respect in all relationships with clients, employees, and partners.

SAFETY

Rigorous processes and practices that prioritize human life above all. Zero accidents is our daily goal.

QUALITY

Excellence in technical execution, compliance with standards, and continuous commitment to exceeding expectations.

PILLARS OF OUR WORK

Foundations that ensure the excellence and breadth of our services

Focus on People

Valuing people as the basis of our growth, promoting an environment of respect and continuous development.

Customer Focus

Understanding and meeting the specific needs of each partner, building customized and lasting solutions.

Timely Delivery

Strict commitment to deadlines and schedules, ensuring operational efficiency and project reliability.

Quality and Safety

High-standard technical execution combined with rigorous safety protocols that protect life and property.

Constant Investment

A modern fleet and cutting-edge tools, combined with continuous training and certification of our professionals.

Ethics and Efficiency

Transparency, integrity, and high performance in managing commercial and operational relationships with our stakeholders.

NATIONWIDE COVERAGE

Strategic operation and maintenance work in Brazil's main states.

São Paulo

SP

Minas Gerais

MG

Manaus

AM

Mato Grosso

MT

Espírito Santo

ES

Roraima

RR

Rondônia

RO

Acre

AC

Bahia

BA

Mato Grosso do Sul

MS

We meet demands across the entire national territory, with mobility and integrated logistics for remote operations.

OUR CLIENTS

We serve utilities, transmission companies, and EPC contractors in several states of Brazil

PORTFOLIO - TRANSMISSION LINES

Proven experience in the execution and maintenance of strategic assets

500 kV

⚡ Fernão Dias – Terminal Rio

⚡ Padre Paraíso 2 – Governador Valadares 6 (C1)

⚡ Governador Valadares – Poções

345 kV

⚡ Santos Dumont 2 – Leopoldina 2 (C1)

230 kV

⚡ Rio Branco – Feijó

⚡ Jauru – Vilhena (C3)

⚡ Jauru – Várzea Grande II (C1 e C2)

230 kV (Continued)

⚡ Coxipó – Várzea Grande II (C1 e C2)

⚡ Rondonópolis – Coxipó (C1 e C2)

⚡ Barra do Peixe – Rondonópolis (C1 e C2)

⚡ Inocência – Ilha Solteira II

138 kV

⚡ Couto Magalhães – Rondonópolis (C1)

⚡ Coxipó – São Tadeu (C1)

⚡ São Tadeu – Jaciara (C1)

⚡ Complexo do Prata – Rondonópolis (C1)

TECHNICAL CAPABILITIES

High-Performance Installation and Maintenance

We ensure the integrity and performance of transmission assets through advanced installation techniques and rigorous maintenance.

Our expertise spans from the installation of critical infrastructure, such as counterpoise cables and precise soil electrical resistivity measurement, essential for protecting the system against lightning strikes and failures.

In the field of maintenance and commissioning, we perform tests, detailed inspections, adjustments, and corrections. Our teams act promptly in system normalization and provide complete technical reports to support decision-making.

Specialized Services:

Counterpoise Cable Installation

Soil Electrical Resistivity Measurement

Commissioning, Testing, and Inspections

Emergency Response on Transmission Lines

O&M

INTEGRAL SOLUTIONS

TECHNICAL CAPABILITIES

LIVE-LINE MAINTENANCE

Execution of energized services with advanced techniques and rigorous procedures, ensuring safe and efficient maintenance without interrupting supply.

Approved Tools

Certified Teams

Specialized Training

TECHNICAL CAPABILITIES

Environmental Management and Right-of-Way Conservation

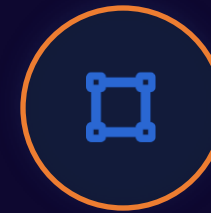

PRAD

Specialized execution and maintenance of Degraded Area Recovery Plans, ensuring the regeneration of the local ecosystem.

VEGETATION MANAGEMENT

Vegetation suppression, mowing, and clearing of the right-of-way and tower areas, maintaining electrical safety distances.

FENCES AND GROUNDING

Sectioning and grounding of fences along the rights-of-way, preventing induced voltages and ensuring the safety of third parties.

Connecting Brazil's energy

Excellence and safety in every connection.
